Subject: List of Potential Cleanup/Reuse Sites

Cyndy,

Attached are some suggested candidates for the list of cleanup/reuse sites in case you'd like some suggestions for your discussions next week. We've pulled these from the regional reuse survey. At this juncture, we've included a mixture of both PRP and Fund lead sites. Melissa Friedland (SRI) independently identified six of the same sites, so those were easy inclusions. We used two spots for the sites identified in your discussions with Byron and/or David F. – Portland Harbor and Columbia Falls (but we do not have additional site-specific info re: reuse/third-party investment at this time). We also included the Quendell site which you have previously mentioned – Region 10 also explicitly identified it for third-party investment (although the amount of money needed is substantial). The remaining two spots were used for two sites where we're already involved (but note that the BFPP agreement at Raymark is fairly late in the process so it may not be appropriate for inclusion). We also have additional candidates from Melissa's and our review of the regional survey if you'd like more suggestions (note that not all regions are represented on the attached list).

I'm in the office today and both Hollis and I are available Monday if you would like to discuss this or need anything.

Thanks,
Susan
